

Water Sustains Life

Cleiciana da Silva Saúde, 8 years-old
Child benefited by the Golfinho Community Association. Project supported by Suzano in Mucuri, BA.

A drink of water is essential to the life of every child. Water is also essential to the papermaking process. Optimizing this vital resource requires a unique partnership.

Working together with Nalco, Suzano Papel e Celulose is producing more paper with less water at its industrial units located in the cities of Suzano and Mucuri, **saving 300 million liters of water per year, or 110 glasses of water for each man, woman and child in the city of Sao Paulo.**

Conserving every precious drop sustains life.
